

Knowledge Mobilization to Promote Mental Health and Substance Use Health of Those Most Affected By the COVID-19 Pandemic

- ✓ **Summary:** This project will mobilize the *EQUIP Equity Action Kit*, which includes learning resources, action-oriented and point-of-care tools, and online modules to support service providers and organizations to bring an equity lens to health care and social services. Equity-oriented care resources focusing on mental health and substance use health will be shared through a media campaign, an online "Showcase Event", and a webinar to engage diverse service providers and educators across Canada. To make the EQUIP resources as accessible as possible to diverse audiences, including Francophone contexts, EQUIP will undertake a community-engaged process to translate and adapt EQUIP resources to French and Francophone service contexts. Collectively, these activities aim to support capacity for equity-oriented care and promote equity in mental health and substance use health for people most impacted by the COVID-19 pandemic and by health and social inequities.

- ✓ **Objective 1:** Mobilize EQUIP equity-oriented care resources through online events and media campaign
- ✓ **Objective 2:** Engage Francophone service providers and community members to guide adaptation of EQUIP resources to Francophone contexts
- ✓ **Objective 3:** Adaptation and translation of EQUIP Resources

To learn more about strategies and tools to support equity-oriented care, find the *EQUIP Equity Action Kit* at www.equiphealthcare.ca
